Family History Consultant
Training Summary and Resources

Family history consultants are skilled teachers who work and communicate well with others. While consultants need not be experts in family history research, they should be comfortable using the resources at FamilySearch.org and helping others use them. These FamilySearch resources include Family Tree, photos and stories, online historical records, and the FamilySearch indexing program.

The Blessings of Temple and Family History Work

“There are some members who engage in temple work but fail to do family history research on their own family lines. Although they perform a divine service in assisting others, they lose a blessing by not seeking their own kindred dead as divinely directed by latter-day prophets.

“I have learned that those who engage in family history research and then perform the temple ordinance work for those whose names they have found will know the additional joy of receiving both halves of the blessing.”
